DAFTAR ISI

Pendahuluan

Wireframe bisa juga disebut sebagai *blueprint* atau rancangan atau desain dari suatu hal, khususnya tampilan, baik itu *website* atau aplikasi atau permainan atau lainnya. Tujuan dibuatnya *wireframe* adalah untuk menyampaikan susunan, struktur, *layout*, navigasi, dan organisir konten.
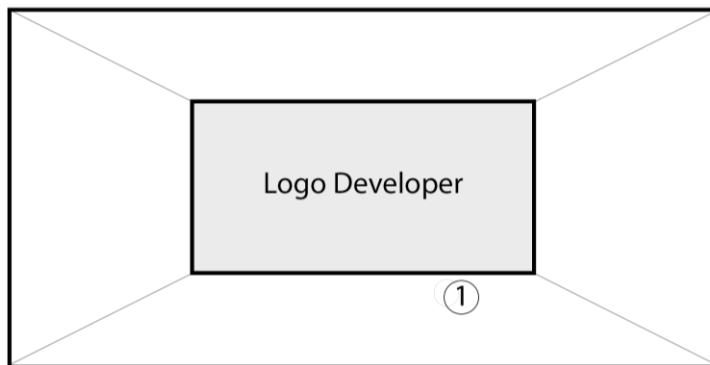

Wireframe yang kami buat bertujuan untuk memberikan gambaran akan struktur tampilan suatu permainan, yaitu MOBA untuk *smartphone*. Desain yang kami terapkan mengambil model efisiensi dan kesederhanaan dalam konten, agar memudahkan para *user* dalam menggunakan aplikasi ini ke depannya.

Untuk desain yang kami buat berjumlah 35 buah *wireframe* dengan beberapa konten berbeda sebagai ciri khas. Untuk referensi, kami menggunakan permainan *Garena AOV* dan *Mobile Legends*. Alasan kami mengambil kedua *game* tersebut sebagai referensi karena konten yang disediakan oleh kedua permainan tersebut cukup mumpuni atau mudah dipahami oleh *user* tanpa harus berlama – lama membaca *hint* atau *tips* atau melalu mode pelatihan dasar.

Berikut adalah hasil desain yang dapat dilihat dalam bentuk laporan *hardcopy*.
